KNX radio blind time switch quicklink, display, K.5, al., matt, lacq.

Technical properties

	± 2 ľ
Running time	2 mr
Random number generator for holiday program	± 15 m
	ETS additional functions: +6 scenes, operating
ETS additional functions	mode, status display, 2 x alarn
Function	reset function (to factory setting) ; with keylock Party function, no execution of automatic, radio and extension unit commands (lock-out protection) Configurable transmission and/or reception behaviour ; easy additional functions: +6 scenes, up/down operating mode
	5
Light scenes	slat position storable for scene ; scene opening via KNX radio appliance:
Quicklink functions	quicklink functions for integration into the individual group and master control of blinds/shutters quicklink functions: blind, 2 scenes, forced control up/down push-buttoi
Slide switch	with switchover manual/automatic mod
Power reserve	≈ 8
Indication / display	compatibility in the display ; LC display contrast i adjustable ; LC display illuminated during operation
Connectivity	
Radio protocol	KNX Radio
Dimensions	
Dimensions Width of rail mounted device (RMD)	0 module:
	0 module:
Width of rail mounted device (RMD) Power	
Width of rail mounted device (RMD) Power	
Width of rail mounted device (RMD) Power Radio transmission power Measurement	< 10 mV
Width of rail mounted device (RMD) Power Radio transmission power Measurement Running accuracy	< 10 mV
Width of rail mounted device (RMD) Power Radio transmission power	0 modules < 10 mV ± 3 min/yea
Width of rail mounted device (RMD) Power Radio transmission power Measurement Running accuracy Battery	< 10 mV ± 3 min/yea

Subject to technical modifications

Colour of design line	aluminiur
Material / workmanship	lacquere
Surface appearance	ma
Connection	
Bus connection	integration in the KNX radio/TP gateway, surface mounted, into the KNX TP syster
Settings	
Minimum slat adjustment time	≈ 150 m
Lamella adjustment on signal duration	< 1
Lamella adjustment on button-press	< 0.5
Programs	astro programme for sunrise/sundown switching wit city/country or co-ordinate input, individuall adaptable ; standalone programme, radio an extension unit commands are not executed ; holida programme for random variation of the operatio times in automatic operatio
Time	with automatic summer-/winter time switching (ca be switched of
Equipment	
Number of operation times for up/down	20/da
Number of radio channels	
Number of quicklink links	max. 20 transmitter/receive
Self-retaining for 2 min on signal length	> 1
Self-retaining for 2 min on button-press	> 0.5
Change-over time for change of direction	< 0.6
Cylinder	2 independent preset programme memories individually adaptabl
Use	
Differentiation characteristic 2 - Sales	with displa
