

1680

LED unit N terminal for switch, light control, black

Technical characteristics

Main electrical features

Nominal voltage	230 V
-----------------	-------

Electric current

Rated current	0.9 mA
---------------	--------

Materials

Colour independent of design lines	black
------------------------------------	-------

Lighting control

Type of lamp	LED
--------------	-----

LED control

Rate current per LED	≈ 0.9 mA
----------------------	----------

Connection

Type of connection	with screw terminal
--------------------	---------------------

Equipment

Lighting	for monitoring circuit per series
----------	-----------------------------------

Use cases

Application	Light control
-------------	---------------

Safety

REACH conform	Yes
RoHS conform	Yes
Halogen free	Yes

Identification

Application, usage	Light control
Main design line	Light control
Secondary design line(s)	Light control, ACCESSORIES

Instructions

Special note text	Refer to the overview for the matching flush-mounted inserts.
-------------------	---
