

KNX radio blind time switch quicklink, display, R.1/R.3/1930/R.cl., black glossy

## **Technical characteristics**

| Astronomic time shift                          | ± 2 ł  |
|--|--|
| Running time                                   | 2 mr   |
| Random number generator for holiday<br>program | ± 15 mr  |
| ETS additional functions                       | ETS additional functions: +6 scenes, operating<br>mode, status display, 2 x alarn  |
| Function                                       | reset function (to factory setting) ; with keylock<br>Party function, no execution of automatic, radio and<br>extension unit commands (lock-out protection)<br>Configurable transmission and/or reception<br>behaviour ; easy additional functions: +6 scenes, 2<br>up/down operating mode |
| Light scenes                                   | slat position storable for scene ; scene opening via<br>KNX radio appliance:   |
| Quicklink functions                            | quicklink functions for integration into the individual<br>group and master control of blinds/shutters<br>quicklink functions: blind, 2 scenes, forced control<br>up/down push-buttor  |
| Slide switch                                   | with switchover manual/automatic mode  |
| Power reserve                                  | ≈ 8  |
| Controls and indicators                        | indication of the application module/inser<br>compatibility in the display ; LC display contrast i<br>adjustable ; LC display illuminated during operation   |
| Connectivity                                   |  |
| Radio protocol                                 | KNX Radio  |
| Dimensions                                     |  |
| Width of rail mounted device (RMD)             | 0 module   |
| Diameter                                       | 58 mn  |
| Power  |  |
| Radio transmission power                       | < 10 mV  |
| Measurement                                    |  |
| Running accuracy                               | ± 3 min/yea  |
| Battery  |  |
| Power reserve [years]                          | 0  |
| Detection                                      |  |
|  | sun protection and twilight-controlled lowering with   |

Sensor
```

sun protection and twilight-controlled lowering with radio brightness sensor

| Materials                                 |   |
|---|---|
| Colour of design line                     | black   |
| Surface appearance                        | glossy  |
| Connection                                |   |
| Bus connection                            | integration in the KNX radio/TP gateway, surface<br>mounted, into the KNX TP system   |
| Settings                                  |   |
| Minimum slat adjustment time              | ≈ 150 ms  |
| Lamella adjustment on signal duration     | < 1 s   |
| Lamella adjustment on button-press        | < 0.5 s   |
| Programs                                  | astro programme for sunrise/sundown switching with<br>city/country or co-ordinate input, individually<br>adaptable ; standalone programme, radio and<br>extension unit commands are not executed ; holiday<br>programme for random variation of the operation<br>times in automatic operation |
| Time                                      | with automatic summer-/winter time switching (can<br>be switched off)   |
| Equipment                                 |   |
| Number of operation times for up/down     | 20/day  |
| Number of radio channels                  | 1   |
| Number of quicklink links                 | max. 20 transmitter/receive   |
| Self-retaining for 2 min on signal length | > 1 s   |
| Self-retaining for 2 min on button-press  | > 0.5 s   |
| Change-over time for change of direction  | < 0.6 s   |
| Cylinder                                  | 2 independent preset programme memories,<br>individually adaptable  |
| Use                                       |   |
| Differentiation characteristic 2 - Sales  | with display  |
| Safety                                    |   |
| REACH conform                             | No  |
| RoHS conform                              | Yes   |
| Halogen free                              | No  |
| Protection                                | with dismantling protection   |
| Use conditions                            |   |
| Operating temperature                     | -545 °C   |
| Energy-saving                             | low intrinsic energy requirement  |
| Relative humidity (without condensation)  | 065 % (without condensation)  |
| Identification                            |   |
| Application, usage                        | Blind control ; KNX radio- operating systems  |
| Main design line                          | Berker R.1/R.3/R.8/Serie 1930/R.classic   |
| Secondary design line(s)                  | Electronics platform ; Berker R.1 ; Berker R.3 ;<br>Series R.classic ; Serie 1930   |

Instructions

Can be switched to orientation led by extension unit. ; Note: When integrating this product into the Serie 1930, the 1gang frame for centre plate Ø 58 mm, order no.: 1382 0... may only be used. Installation in multiple combinations of the Serie 1930 is not possible!

Special note text
