

LF520G

**Zekering CHT22-20 A Ø 22 x 58 mm**

**Technische eigenschappen**

**Zekering**

|                    |         |
|--------------------|---------|
| Kenmerken zekering | gG      |
| Zekeringsgrootte   | 22 x 58 |

**Stroom / temperatuur**

|                 |      |
|-----------------|------|
| Nominale stroom | 20 A |
|-----------------|------|

**Vermogen**

|                                                     |        |
|-----------------------------------------------------|--------|
| Vermogensverlies bij nominale stroom I <sub>n</sub> | 2,70 W |
|-----------------------------------------------------|--------|

**Belangrijkste elektrische eigenschappen**

|                                                                              |       |
|------------------------------------------------------------------------------|-------|
| Nominaal kortsluitafschakelvermogen I <sub>cn</sub><br>AC volgens IEC60898-1 | 80 kA |
|------------------------------------------------------------------------------|-------|

**Spanning**

|                   |             |
|-------------------|-------------|
| Type voeding      | AC          |
| Nominale spanning | 690 - 690 V |
