## 01 Funkcije

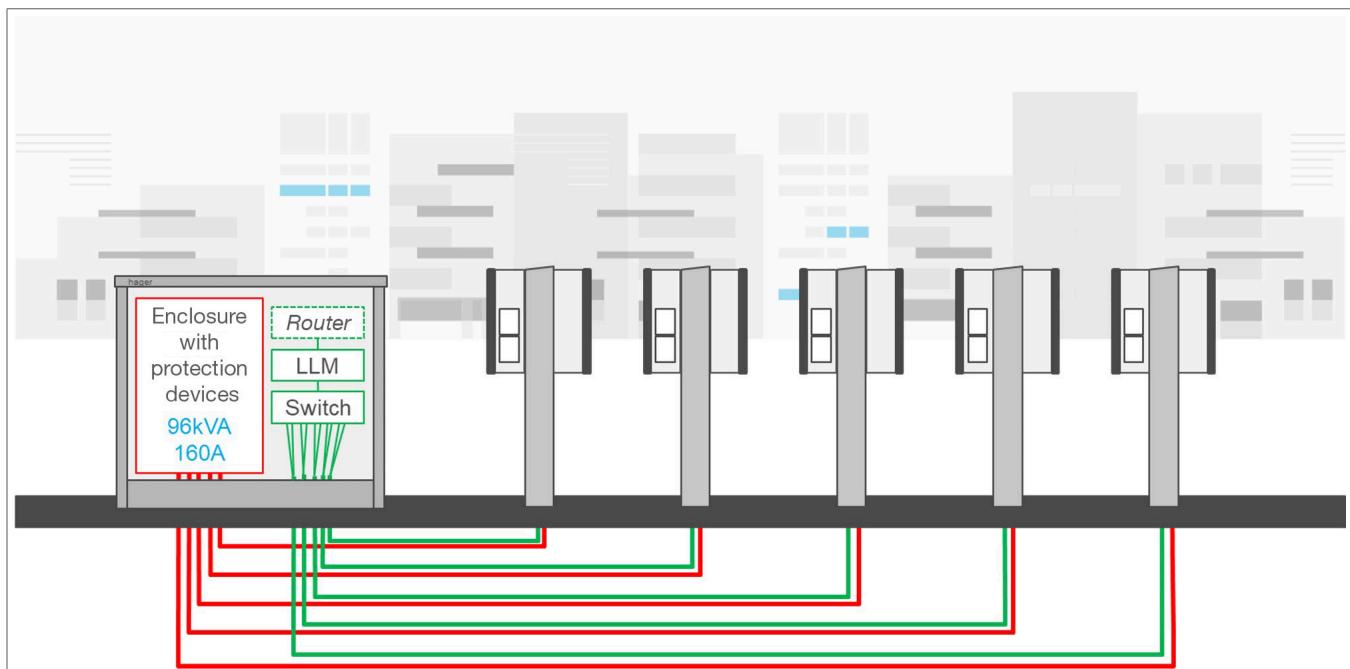

### Za montažu u razvodni ormar

- Dinamičko i statičko upravljanje energijom
- Upravljanje RFID karticama
- Upravljanje parametrima punjača za električna vozila
- Nadzor potrošnje
- Praćenje korištenja po sesiji punjenja (oznake/Badges)

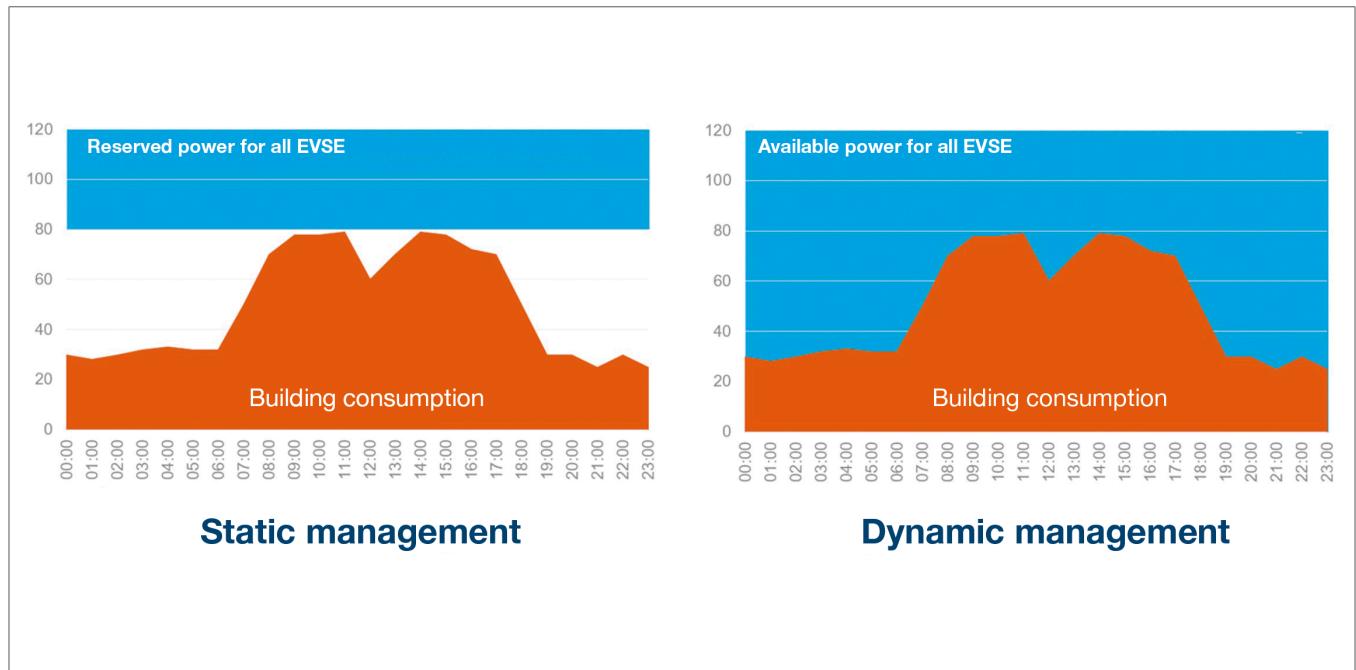

## 02 Instalacija

## 03 Primjer povezivanja

## 04 Upravljanje energijom

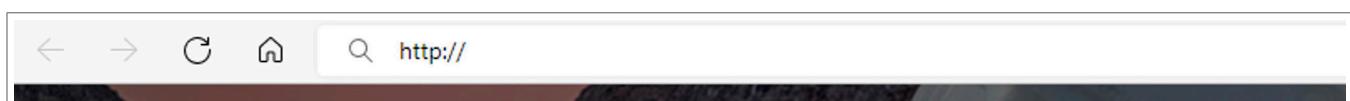

Za instalacije u objektima gdje ima više izlaza za punjenje, lokalni menadžer opterećenja omogućava privremeno prilagođavanje snage koja se koristi za punjenje električnih vozila u odnosu na ukupnu potrošnju objekta.

U slučaju prekomjerne potrošnje aktivira zaštitne uređaje i time sprječava nestanak energije u cijelom objektu. Dinamičko upravljanje, dakle, omogućava potpuno iskorištavanje raspoložive energije za punjenje električnog vozila bez izazivanja prestanka napajanja energijom.

Osim toga, uz dinamičko upravljanje se može obezbijediti veći broj stanica za punjenje nego u sistemu bez LLM-a uz iste karakteristike.

## 05 Konfiguracija

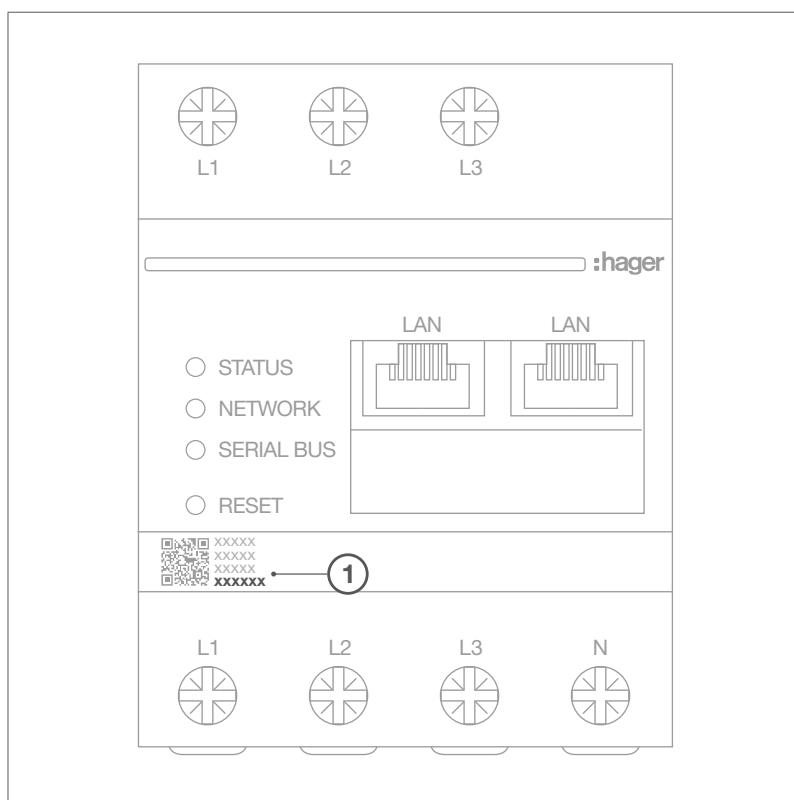

### 05.01 Prijava

Pristupite stranici za konfiguraciju:

- ① Otvorite mrežni browser
- ② Unesite:
  - [http://hager-llm-\[6zadnjih\\_karaktera\\_UID\]/](http://hager-llm-[6zadnjih_karaktera_UID]/)  
(primjer: <http://hager-llmab4df5/>)

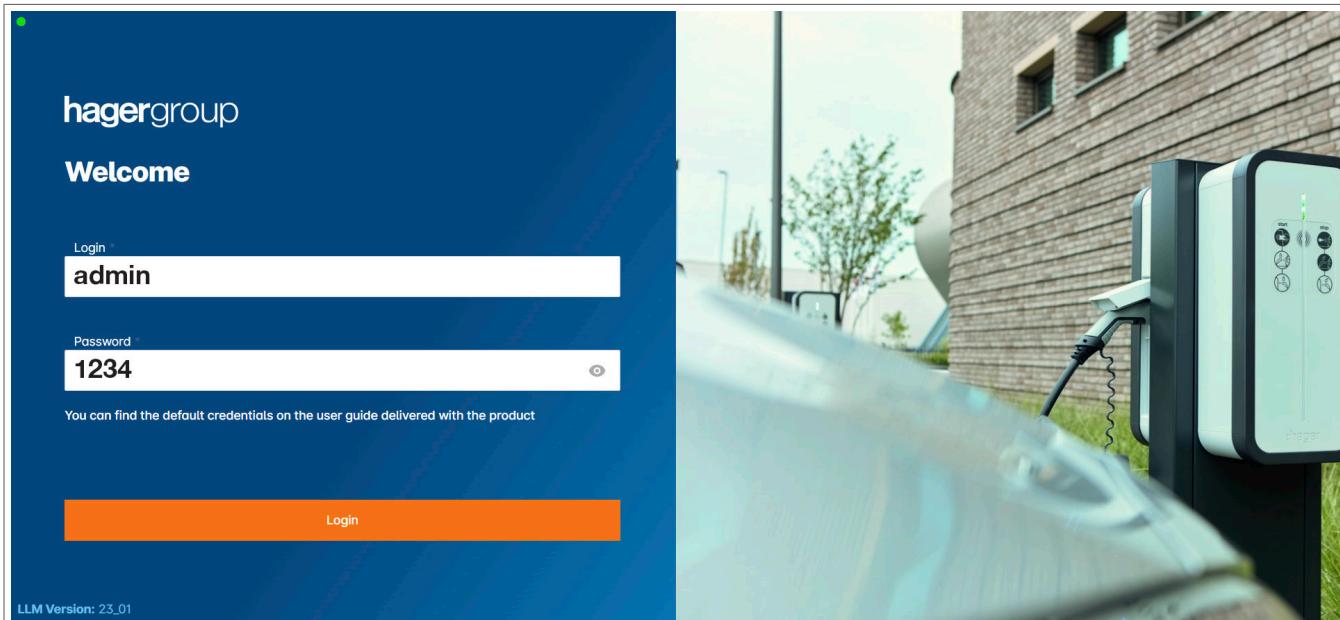

**i** **Informacija**  
Posljednjih 6 znakova se nalaze sa prednje strane proizvoda „QR kod“<sup>①</sup>.

## 05.02 Prvo povezivanje

❶ Unesite korisničko ime i šifru:

- Default korisnik: admin
- Default šifra: 1234

❷ Nakon što kliknete **Prijava/Login**, sistem će zatražiti unos nove šifre koja je u skladu sa sljedećim minimalnim zahtjevima:

- Jedno veliko slovo
- Jedno malo slovo
- Jeden broj
- 8 znakova
- Jeden simbol

## Security

For security reason, you need to change the default admin credential

**New administrator password**

Password is required.

The password must respect the following rules:

- ☒ including 1 capital letter
- ☒ including 1 lower case
- ☒ including 1 number
- ☒ 8 characters minimum
- ☒ including 1 symbol

**Confirm Password**

Password required

Validate

- ③ Postavite datum i aktuelno vrijeme

### Configure date & hour

Country  
France

Timezone  
Europe/Paris

Date  
27/01/2023 

Hour  
14:29 

- ④ Definirajte pristupačnost stranice kontrolne ploče

**Javna:**

Svi koji se nalaze na istoj mreži kao i LLM, imaju mogućnost pristupa kontrolnoj ploči.

**Privatna:**

Samo korisnici koji su kreirani u LLM-u imaju pristup kontrolnoj ploči.

### Dashboard accessibility

Public access  
Everyone can access the dashboard

Restricted access  
Only registered users may access the dashboard

Slijedite savjete vodiča za nastavak konfiguracije.

### Before we start

Make sur that all charging stations are connected to the network and turned on.

Click on the arrow to learn what we are going to do.

>

Skip

- ① Osigurajte da su svi punjači uključeni i povezani na mrežu.  
Kako biste ovo provjerili, skenirajte mrežu i provjerite da li su svi punjači vidljivi na mreži. Ukoliko to nije slučaj, onda provjerite sva fizička ožičenja.
- ② Definišite operacijski mod kontrole punjača(statički ili dinamički)
- ③ Skenirajte punjače na IP mreži
- ④ Definišite strategije pristupa za punjače (RFID kartice)

## 05.03 Definisanje strategije upravljanja

### 05.04 Detekcija punjača za električna vozila

The screenshot shows the LLM software interface. On the left sidebar, under 'LLM OVERVIEW', it says 'Not running' and 'No EVSE configured'. Under 'LLM CONFIGURATION', 'Charging stations' is selected, showing 'No EVSE configured'. The main panel displays 'Charging stations' with a note 'Max 10 charging points'. It shows three icons representing 'Hager charging station' with green vertical bars. Below them, text says: 'These can be found automatically.', 'Even better, they will be automatically pre-configured.', 'It could take some time, the EVSE will appear automatically as soon as they are connected to the load manager.', and 'EVSE will reboot during the association with the load manager.' A large orange '+' button is in the bottom right corner of the main panel.

① Pokrenite detekciju punjača tako što ćete kliknuti na

#### Informacija

Proces detekcije može potrajati određeno vrijeme, punjači će se pojaviti automatski čim budu povezani na LLM(Lokalni menadžer opterećenja).

Ovaj korak vrši konfiguraciju punjača za električna vozila.

Sljedeća slika prikazuje primjer punjača otkrivenog tokom procesa detekcije.

The screenshot shows the LLM software interface. The left sidebar shows 'Not running' and 'No EVSE configured'. The main panel shows 'Charging stations' with a note 'Max 10 charging points'. A table lists one detected EVSE: 'hager-evcs-cPW7zN' (EVSE 0), 'OCPP\_ID: ENFEgS5Zy8NUGTSWcPW7zN', 'Charging points: X Charging points', and 'Phase: Not usable'. There are edit and delete icons for the row.

② Odaberite punjač za električna vozila tako što ćete kliknuti na isti

Podesite punjač:

**③ Naziv:**

Unesite naziv punjača, ovaj naziv će se pojaviti na displeju

**④ Mapiranje faza:**

Odaberite ožičenje punjača

**⑤ Maks. struja po fazi:**

Granica zaštite u A

**⑥ Sačuvajte konfiguraciju**

### Oznake (Badges) po punjaču

The screenshot shows the 'Basic settings' page for a charging station named 'HAG\_ST1'. The left sidebar lists various configuration sections: Overview, Support, General settings (Configured), Charging stations (8 stations configured), Clusters (2 defined clusters), Charging authorisation (Badges required), Load shedding strategy (Max current per session), User management (X users), System settings (System info, datashare...), and Configuration tutorial.

The main form contains fields for Hostname (Hostname), Name (HAG\_ST\_1), Phases Mapping (L1, L2, L3), Cluster (Cluster #1 (default)), IP address (XXX.XXX.XXX.XX), and Charging authorisation. A dropdown menu titled '1 associated badge' shows a list of badges: Badge 1 (checked), Badge 2, Badge 3, Badge 4, and Badge 5. The 'Badge 1' entry has a circled number '7' next to it, indicating seven associated devices.

- ⑦ Ova postavka daje ovlaštenje za sve ili samo neke oznake(Badges) za punjenje na ovom konkretnom punjaču za električna vozila.

Primjer: samo **Oznaka 1** može puniti na ovom punjaču.

## 05.05 CPO veza (dostupno samo sa XEM520)

- ① Kada je izvršena detekcija punjača te je isti konfigurisan pomoću XEM520, možete aktivirati funkciju **Charging Point Operator** (Operator tačke punjenja).
- ② Odabir CPO i vezane postavke se mogu podesiti u meniju **postavke/Settings**.

### Operator tačke punjenja

- ① Odaberite **CPO server** sa kojim se želite povezati i kliknite na **Dalje/Next**.  
Ovdje se prikazuju svi prethodno detektovani punjači.
- ② Unesite **OCPP ID** za svaki punjač i pokrenite preko **Poveži na CPO**.

The screenshot shows the LLM Overview and Configuration sections. In the Configuration section, the 'RFID card' option is selected, indicated by a blue border. The main content area shows the 'Charging stations' configuration with a single entry. The 'CPO accepted' status is shown as green.

Ukoliko su svi podaci ispravni, putem **CPO prihvaćen/accepted** ćete vidjeti da su punjači povezani na CPO.

**Informacija**  
U ovom režimu, upravljanje oznakama/Badges više ne vrši LLM. To je preuzeo CPO.

## 05.06 Postavke RFID kartica

The screenshot shows the LLM Overview and Configuration sections. In the Configuration section, the 'RFID card' option is selected, indicated by a blue border. The main content area shows the 'Badges' configuration screen. A callout box with number 1 points to the 'RFID card' section in the sidebar. A callout box with number 2 points to the badge icon in the center. A callout box with number 3 points to the 'Edit rule' button in the top right corner.

① Odaberite **RFID kartica/card** u meniju.

② Programirajte oznake/Badges:

- Skeniranjem oznaka/Badges na punjačima koji su povezani sa LLM
- Uvozom csv datoteke
- Pojedinačnim manuelnim dodavanjem kartica

- ③ Definišite pravilo pristupa za punjače za električna vozila tako što ćete odabratи **Edit rules/Uredi pravila.**

- Slobodan pristup
- Neophodna označka/Badge

### Skenirajte označke/Badge

- ① Kliknite na i odaberite **skeniranje označaka/badges**

# Konfiguracija

## Postavke RFID kartica

Scan badges from stations

Please go in front of a charging station whose LED is green and scan badges that you would like to add.

②

Cancel Ok

Pending (2)

Pronađena RFID kartica

The screenshot shows the 'Badges' section of the LLM software. On the left, there's a sidebar with 'LLM OVERVIEW' (Running All Set), 'LLM CONFIGURATION' (General settings Configured, Charging stations 1 stations configured, RFID card 2 badges added, User management 0 users, System settings System information, date/hour), and a note about LLM version: LLM\_2023\_01. The main area shows a table of badges with columns for Standard (2), Supervisor (0), and Pending (0). One badge is selected, showing its details in the 'Badge edit' modal.

- ③ Odaberite oznaku za personalizaciju pomoću postavke opcije oznaka/badge options.

The screenshot shows the 'Badges' section of the LLM software. The sidebar includes 'LLM dashboard' (Overview, Support) and 'LLM configuration' (General settings Configured, Charging stations 8 stations configured, Clusters 2 defined clusters, Badges 10 badges added, Load shedding strategy Max current per session, User management X users, System settings System info, date/hour, Configuration tutorial). The 'Badges' table in the main area has several rows of badge entries. A 'Badge edit' modal is open, allowing configuration of badge parameters like activation status, type, expiration date, energy usage, and charging permissions.

- ④ Odabirom jedne od ovih opcija, RFID kartica se može omogućiti za punjenje na svim punjačima (**Sve EVSE**) ili na jednom konkretnom punjaču.

Primjer: **Oznaka 1** može puniti na **EVSE1**.

## 05.07 Upravljanje korisnicima

- Kreiranje korisnika

The screenshot shows the 'User management' section of the LLM interface. On the left, there's a sidebar with sections like 'LLM OVERVIEW' (Running All Set), 'LLM CONFIGURATION' (General settings Configured, Charging stations 1 stations configured, RFID card 2 badges added, User management 0 users, System settings System information, date/hour, Configuration tutorial), and a note about LLM version LLM\_2023\_01. The main area is titled 'User management' and lists users with columns for 'Username', 'First name', 'Name', and 'Role'. A blue '+' button is located in the bottom right corner of the list area.

Nakon što pritisnete popunite sljedeće elemente:

- Ime korisnika
- Profil
- Nova šifra
- Potvrda šifre

The screenshot shows the 'Add a user' dialog box overlaid on the main 'User management' screen. The dialog has fields for 'Username' (empty), 'Profile' (set to 'Advanced'), 'New Password' (empty), and 'Confirm Password' (empty). At the bottom is a 'Validate' button.

### Informacija

Šifra je privremena i mora se promijeniti nakon što se prvi put prijavite.

## 05.08 Kontrolna ploča

The screenshot shows the LLM Overview page with the following sections:

- Available power management:** Dynamic, Adjusting to other load demand.
- Max. current per phase:** 160 A, Tri phase.
- Charging stations:** 1.
- EVCS access rights:** Badge required, 2 badges.
- Consumption:** Overall, Total EVSE, in real time. Data table:
 

	L1	L2	L3	L1	L2	L3
→	0 A	0 A	0 A	0 A	0 A	0 A
- Charging sessions:** in real time. Data table:
 

Label	Connector	Status	L1	L2	L3	Energy
Charging station 1	1	Preparing	-	-	-	-

U ovom pregledu možete pronaći podatke o vašoj instalaciji, vizualizaciju potrošnje i vizualizaciju sesija punjenja.

### 05.09 Export funkcija

**Consumption**  
in real time

Overall	XX A	Total EVSE	XX A
→ L1	XX A	→ L1	XX A
