

TCC510S

Presence detector 360° monobloc KNX, white

Architecture

Bus system	KNX
------------	-----

Functions

Function	Linking several detectors in order to expand the detection area
----------	---

Connectivity

Bus system radio frequent	No
---------------------------	----

Detection

Side detecting distance	8 m
-------------------------	-----

Detection angle	360 °
-----------------	-------

Angle of vertical detection	55 °
-----------------------------	------

Materials

Colour	white
--------	-------

RAL colour	RAL 9010 - Pure white
------------	-----------------------

Material	PC-ABS
----------	--------

Surface appearance	matt
--------------------	------

Installation, mounting

Maximum Mounting Height 4 m

Settings

Setting with potentiometers for setting the response brightness and delay time without dismantling

Equipment

Number of channels 1

Angle of horizontal detection 360 °

Use conditions

Operating temperature -10/45 °C

Temperature

Operating temperature -10/45 °C

Identification

Designation syntax: Core designation/function IR presence detectors
